

Universal Document Converter is the most complete solution for the conversion of documents of any types into Adobe PDF or graphic files. The underlying basis of Universal Document Converter is the virtual printing technology. As a result, exporting Microsoft Word documents, Excel tables, PowerPoint presentations, or Autodesk AutoCAD drawings into a chosen format is just as easy as using a desktop printer.

With Universal Document Converter, exporting documents is exporting worries away!

#### Export into 8 formats

Convert documents into PDF or image files – TIFF, JPEG, PNG, PCX, DCX, GIF or Bitmap.

#### Versatility

Drawings and reports, scans and posters. Virtual printing technology made file conversion effortless!

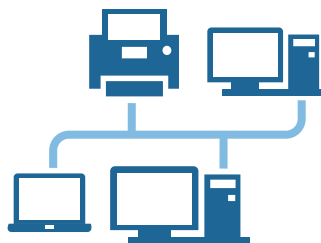

#### Combine Documents

Create multipage PDF, TIFF or DCX documents from files of various types in mere seconds.

#### Corporate Workflow

Instantly access Universal Document Converter remotely thanks to compatibility with Microsoft Windows Terminal Services and Citrix.

#### Native Network Support

Share Universal Document Converter over a network and use it on laptops and workstations to dramatically speed up conversion of documents.

#### API for Developers

Public API simplifies integration of the Universal Document Converter software with the document management system in the business office.

Universal Document Converter can assist you in preparation of documents for web publishing, while protecting them from unauthorized copy & paste practices.

And, of course, choosing Universal Document Converter means big savings. Not only do you cut expenses on the development and implementation of a corporate document flow system, but you also save your precious time when preparing PowerPoint presentations and sending materials to the printshop or publisher.

Business license of single user costs \$69. Volume discounts are available starting from licenses for 5 users.

Free evaluation version is available on the official software web site: [www.print-driver.com](http://www.print-driver.com)
